Subject: Application seeking guidance for netting under EHV lines in our school campus.

Respected Sir,

This is to bring to your kind notice that there is an EHV line passing through our school campus. The proximity of the EHV line could pose a risk on multiple fronts.

In light of our concerns, we kindly request your assistance/guidance in building a net under the EHV lines so that the lines do not touch the ground under any circumstance and enhance safety.

If there are specific precautionary measures that the school administration or local community can undertake, we would be keen to implement them with guidance from your technical team whether the expenses borne are from the office or from the school .

We also request the possibility of periodic safety assessments of the EHV line's impact on the school compound, ensuring that any emerging risks are promptly identified and addressed.

Yours sincerely,

Principal
